EXPERIENCE

Web Design/Developer

Freelance – New York, NY

May 2025 – Current

- Collaborated with clients to design and build customized websites with modern web technologies.
- Independently managed freelance responsibilities, such as billing, maintenance, and customer support.

Software Engineering Instructor

iD Tech – New York, NY

June 2024 – July 2024

- Taught programming in Java and game development in Unreal Engine 5 to students ages 7-17.
- Managed classes of up to 12 students, prioritizing the safety, education, and well-being of each student in a fast-paced environment.

Intern

Monira Foundation – Jersey City, NJ

October 2023 – May 2024

- Led technical troubleshooting of PCs, printers, and projections for exhibitions, events, and internal use.
- Managed and debugged the non-profit's WordPress website.
- Designed graphical content for social media, increasing public engagement.

Software Engineer/Consultant

Sentinel Technology – Seoul, South Korea

March 2021 – May 2023

- Developed security software used by governmental organizations, preventing 10,000+ cases of personal information leaks on the web.
- Managed 12+ clients, providing over-the-phone and in-person customer support.
- Traveled on-site to lead meetings with clients and provide in-person technical assistance.
